

Utility Aid Partner Website Content Guide

This page provides approved copy and messaging for partners who wish to describe Utility Aid on their website. It ensures consistency, accuracy, and clear positioning of Utility Aid as a trusted energy cost recovery and protection partner for the UK not-for-profit sector.

About Utility Aid

Utility Aid exists to protect charities and not-for-profit organisations from wasting money on energy. We check every bill, challenge every error, and recover what's owed — with over £10 million returned to the sector so far.

Since 2002, we've helped charities, housing associations, schools, churches, and community organisations reduce costs, recover overcharges, and manage supplier relationships.

Everything we do is focused on helping organisations spend less on energy and more on the people and communities they support.
